PRESSURE SENSITIVE ADHESIVE -FRA-

Fire retardant

Description

- Rubber base pressure sensitive adhesive
- Polyester protective film
- Temperature range: from –20°C to 80°C .
- Widths : 20mm, 25mm, and 50 mm
- Colors : ☐ ☐
  000 958

Applications

- Designed for applications where fire retardancy is required
- Recommended for aircraft applications (Seating, insulation blankets…)

Packaging

Widths	**20mm**	**25mm**	**50mm**
Meters / box	250 ml	200 ml	200 ml

Performances

- **Tack :**

The tack is generally defined as the initial peel strength of the adhesive, measured in cN/cm.
After 10 minutes: 1750 cN/cm After 24hours : 2400 cN/cm

- **Creep resistance :**

Creep resistance is defined as the capacity of the pressure sensitive adhesive to remain in position while under load.
The pressure sensitive adhesive –D- remains in position while under load 200 cN/cm² at 22°C and 50 cN/cm² at 60°C.

Certifications

- FAR 25.853 (12 sec)
- ABD 0031
